

TechnoSpin Israel

Implementation of small wind
government incentives

Manufacturer's perspective

Scope

- Period – since September 2009
- Experience – accumulation of output of distributors and installers

Regulation – benefits and flaws

- Regulation itself – huge benefit
- Type of incentive – FIT vs grant
- Too much paternalism
- Loose ends

Main barrier – building permits

- Lack of central policies
- Local bureaucracy
- Lack of professional tools
- Lack of awareness

Wind measurements

- No wind maps
- A lot of existing wind measurement not publicly available
- Some hope – market and NGO's

Equipment

- Problem of SWT standards
- Work of Committee on Israeli SWT standard
- Testing institutions
- Government assistance required

Money

- Problems of bankability
- Private investment
- Influence of the economic crisis

Projection for future

- What do we have
- Comparison with PV regulation
- Comparison with incentives abroad
